

Gold Standard[™] Guitar & Bass Cables

Cables have a way of putting their own unique stamp on your sound and they do all sound just a little bit different from one another. Some have too much Highs, some not enough, while others have tremendous Bottom-end, at the same time sounding flat and lifeless! Fulltone's Gold Standard[™] low-capacitance cables with Gold-Plated ends keep the higher frequencies in-tact over longer lengths of cord without sounding shrill. Having said that, a cable that passes more Highs and Lows does not necessarily result in a Cable that sounds best for Guitar and Bass applications, as evidenced by the many expensive cables you've tried and rejected! I designed the Fulltone Gold Standard[™] specifically for Guitarists and Bassists, choosing all materials (oxygen-free copper, shield, etc), construction methods, and plating for a sound not only strong in Lows and Highs, but also rich in the Mid frequencies where all the complex overtones lie, a crucial area often overlooked by other Premium cables. Fulltone cables are also built to outlast you, and I feel confident enough in their construction to offer a "Limited Lifetime Warranty." ***Thank you for your purchase, Sincerely, Michael Fuller***

WARRANTY INFORMATION

This cable is guaranteed to be free from defects due to materials and workmanship for as long as it is owned, no receipt or proof of purchase is necessary.

This warranty does not cover damages due to misuse or negligence, and under no circumstances is Fulltone liable for any lost wages, profits, or any incidental or consequential damages arising from the use or inability to use the cable. All cables have a certain amount of handling noise, and this is not covered by the warranty. If the cable fails, simply return it to any authorized Fulltone Cable Dealer for a prompt exchange with the same model if the dealer determines that the failure falls under "covered" status, or contact Fulltone directly.

All shipping costs are the financial responsibility of the cable owner.
